

I want to take this opportunity to express my appreciation for satellite radio and ALL the options for information available from satellite radio, whether it is news, talk, music, comedy or local weather and traffic information. I understand the broadcast industry may be trying to restrict what can be made available through satellite radio. I oppose any restriction to satellite radio content. It should be my choice to purchase a subscription and select what I want to hear. Let broadcast radio compete for listeners on their merits, not by legislation.
Thank you for your attention.

Ann Franklin
